PROJECTS

Cinefy | cinefy.herokuapp.com
- Prototype for an app to accompany movies with timed trivia, product info, music, etc.
- Worked with a team of four JavaScript full-stack developers to build a web app ground-up within a four-day sprint.
- As sole UI Developer, I produced style tiles for color and typography direction, wireframes for the site structure, and led development for all HTML and CSS components of the site.

Technologies used: AngularJS, Node.js, HTML, CSS, SMACSS, responsive grid, and media queries

Portfolio | www.keribrady.com
- Designed with a mobile-first strategy, with a focus on modular, reusable code
- Built from the ground up with design principles in mind and clean code as a major goal

Technologies used: Semantic HTML5, Sass, media queries, responsive grid, and SMACCS principles
